	R	eplac	ement	Produci	ts for Ca	strol		
Background:	Customer needs to find replacement products for the rust preventative oil and coolant they are using for storing tubing. The products currently used by customer do not provide long lasting corrosion protection. Customer needs something that will eliminate any corrosion for tubing stored indoors for up to 24 months.							
Purpose:	To find a replacement product for the coolant and the oil.							
Materials:	Castrol WY3-086B water based coolant Castrol R03-126A oil based rust preventative VpCI-325 VPCI-345 VpCI-329D Ecoline Cutting Fluid Carbon Steel Panels							
Method:	ASTM D-1748 (Humidity chamber)							
Procedure:				e was use g solutior				
	Panel ID	Oil	Coolant	VpCI-325	VpCI-329D	DI Water	VpCI-345	Ecoline CF
	A26	100%	-	-	-	-	-	-
	B26	-	100%	-	-	-	-	-
	C26	-	-	100%	-	-	-	-
	D26	-	-	-	100%	-	-	-
	E26	-	-	-	-	95%	5%	-

-*Note- percentages are based on weight

2) Coat each of the prepared samples onto clean carbon steel panels.

95%

-

- 3) Hang the panels to dry for a minimum of 2 hours.
- 4) Place the panels in the humidity cabinet and inspect them for any signs of corrosion on a regular basis.
- 5) Record the time and date of the first appearance of corrosion.
- 6) Panels B26, E26, and F26 were taken out of the cabinet after 432 hours, hung to dry, and then photographed.
- 7) Panels A26, C26, and D26 were taken out of the cabinet after 530 hours, hung to dry, and then photographed.

F26

5%

Results: The following results were found for the Humidity Cabinet Test:

Panel ID	Time to Failure		
A26	330 hours		
B26	50 hours		
C26	525 hours		
D26	437 hours		
E26	75 hours		
F26	430 hours		

Conclusion: Cortec's EcoLine Cutting Fluid at a concentration of 5% would be a good replacement product for the Castrol WY3-086B coolant. This product based on soybean oil and it is very environmentally friendly. A good replacement for the Castrol R03-126A oil would be VpCI-325, in which mineral oil is replaced by Canola oil, to make the product very safe for environment.
