Cortec Corporation Passes ISO 9001 Audit with Flying Colors!

Cortec's ISO audit was a huge success, passing without a single non-conformance! We are very proud to announce that during our audit, we were complemented on the high quality of our products, which is backed up by our 99.97% product approval rating. Our highly functional ISO 9001 Quality Management System, also positively reflects on our logistics, resulting in a 96.63% global on-time delivery rate.

Not only were we one of the first ISO certified companies in Minnesota, we were the leader in the corrosion industry, becoming ISO 9001 certified before any other. In 1994 we were first registered compliant with the International Standard, and after 11 years we are still the leaders by being one of the first to implement the 2000 Standard.

We take pride not only in the results of the audit, but in the fact that the successfulness of our Quality Management System is due to the hard work of all employees on all levels, from production to management. The importance of this system and its success not only lies in the quality of our products, but also positions us to achieve our strategic goal for the future, which is successful implementation of Six Sigma system.
