

PRODUCT INNOVATION

NEW MCI®-2019 X ADDS GREATER FLEXIBILITY TO MCI® PORTFOLIO

Cortec® Corporation is pleased to announce a new addition to its line of concrete surface treatments. MCI®-2019 X is a 40% silane penetrating water repellent minus the typical Migrating Corrosion Inhibitors of MCI®-2019. The reason for not including MCI® is the same reason that Cortec® released MCI®-2018 X without MCI® in early 2024: some contractors need more options to adapt to specific project budgets and parameters.
